

Applied Robotics Corporate Profile

Applied Robotics is an international company specializing in providing end-of-arm tooling and connectivity solutions for the automation and robotics industries. Since its inception in 1983, Applied Robotics has been the company industries have relied on to increase efficiencies and improve manufacturing processes.

An ISO-9001 registered company; Applied Robotics designs and manufactures automation service solutions, including tool change systems, collision sensors, grippers and connection systems. Serving as a consultative engineering partner, Applied Robotics works with other leading robotic manufacturers to provide the best automation technologies when solving its customers' complex automation needs.

Today, the company operates worldwide providing automation solutions to a wide spectrum of customers and industries ranging from large Fortune 500 companies to small privately-held businesses. Applied Robotics' robot wrist-down solutions can be found in manufacturing, welding, assembly, palletizing, material removal material handling, laboratory, and food handling applications throughout the United States, Canada, Pacific Rim, Europe, Mexico, Asia, Australia, South Africa and South America. Having served the automotive industry for more than 20 years, the company is now also applying its service solutions to other markets, such as general industry, food and the life sciences industry.

An employee-owned company, Applied Robotics has maintained its competitive advantage throughout the years. The company reported approximately \$10 million in annual revenue in 2007, as well as introduced the Smart Gripper™ solution to North American and European markets. Applied Robotics has also been granted over 40 national and international patents for such inventions as the integrated stud welding robotics tool changing system, the single axis robot force sensor assembly and a robot overload detection device, as well as carries trademarks for its XChange and *QuickSTOP* products.

Applied Robotics is headquartered in Glenville, N.Y., and has offices in Southfield, Michigan and Distributors and industry partners world wide. For more information about Applied Robotics and its automation packages, visit www.appliedrobotics.com
